3. Offline Engine & Security Countermeasures

Threat Model	System Defense & Pass Verification Rule
Screenshot & WhatsApp Sharing	Once scanned at Gate 1, ticket status updates globally across all scanners within seconds. A secondary scan attempt triggers instant DUPLICATE SCAN ALERT .
Pass-Back (Ticket handed back across fence)	Instant timestamp registration. Re-scanning the same ticket within 5 minutes or at an adjacent gate immediately trips a security warning.

Fake Generated QR Codes	QR payloads use HMAC-SHA256 digital signatures. Counterfeit generated QR codes fail cryptographic decryption and display FAKE TICKET .
